

New Adult Hospitalist H&P: Click [here](#) for Video Tutorial

1. Patient History

- a. The new history is set up the same as the problem list. Any Medical conditions that are added in the history section will show up in the problem list unchecked.

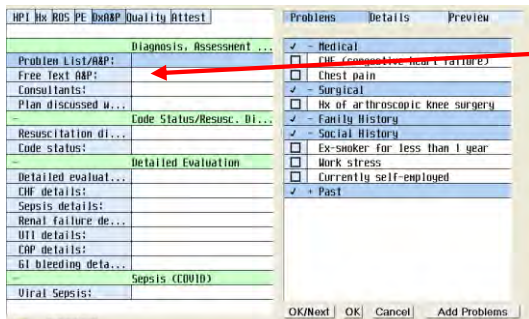

Select Patient History from History tab

Add content to the Medical, Surgical, and social History

2. Problem List/A&P

- a. Any medical problems that were added in the history section will show up here unchecked.

Select Problem list, if the problems were added in the history you can check mark them. If they need to be added then you can add them here

3. Detailed Evaluation

- a. Choose one of more critical signs and symptoms observed during the initial visit to support documentation that describes the complexity of the underlying condition requiring an inpatient stay.
