PDOC updates

CONFIDENTIAL – Contains proprietary information.
Not intended for external distribution.

Updates details by Service Line

1. General Medical:

- a. The “Separately billable procedures” field has been added to all Inpatient template notes that contain the fields to mimic the ED template notes.
- b. The response has been added to the *Consultants* field in all note templates.
- c. Hospitalist Notes: The “on oxygen” response has been added to the Respiratory field in all Hospitalist note templates ensuring that the recall function remains intact among these notes.
- d. The “Primary Care Physician (PCP)” has been added to all Consult note templates under the HPI tab and the PCP will pull from the PCP field in the Admission module. The PCP will recall from the Admission module.

2. Hematology/Oncology History & Physical Note:

- a. The Hema/Oncology History & Physical Note has been updated with an added “TNM” field below the Problem List/A&P in the Diagnosis, Assessment & Plan (DxA&P) tab. The TNM field includes the following items.
 - Primary Tumor
 - Regional lymph node status
 - Distant metastasis
 - Clinical prognostic stage
 - Treatment plan

3. Modified Rankin Score:

- a. The Modified Rankin Score has been added to the following note templates:
 - Neurology Progress Note, Neurology Consult – Brief , Neuro Oncology Progress Note, Neuro Interventional Progress Note, Neurosurgical Consult, Neurology Consultation Note, Neuro Interventional Consult, Neurology Intensivist Progress Note, Neurosurgical Progress and Neurosurgical Consult – Brief

4. Palliative Care Progress Note:

- a. Documentation within the “Goals of Care” field will now be available to recall into subsequent notes.

Updates details by Service Line (cont.)

5. Trauma:

- a. The “Time at bedside” field has been updated and is now “*”required in both Trauma Consultation Note and Trauma Consult - Brief note templates.

6. Well Baby and NICU: (*education subject to change per Corp document)

- a. The Wellbaby note templates have updated Nursing data canned text fields (additions and removals)

- b. The following templates are effected:

- Wellbaby – Attend at Delivery
- Wellbaby – Admission H&P
- Wellbaby – Discharge Note
- Wellbaby – Progress Note

- b. NICU

- i. The Kaiser Sepsis Score section has been added to multiple provider note templates. The templates affected are as follows:

- NICU Progress
- NICU History & Physical
- NICU Discharge
- Neonatal Cardiology Consult

7. OB/GYN:

- a. The Free Text A&P field has been updated to recall to the following note templates: OB Antepartum Progress Note, OB Intrapartum Progress Note, and OB Postpartum Progress Note

- b. The OB Triage Visit note has been updated to include a full Physical Exam, as the current state is limited to a GYN Exam. The Objective tab mimics the OB H&P Note’s Physical Exam.

- c. The OB Discharge Postpartum Progress note has been updated to mimic the same Assessment responses as the OB Postpartum Progress note.

- d. The OB Delivery Note

- a. The Admission indication is recalling from the Level of Care admission reason field. If the provider has not documented the 37-39 week admission, the provider can free text the indication on the note.

- b. A new field, “Decision to incision time”, has been added to facilitate documentation for this perinatal safety measure with 3 response options

Updates details by Service Line (cont.)

- d. The OB Postpartum Progress Note and OB Antepartum Progress Note has been updated with a new Medications field in the Objective tab, which will pull in the patient's current hospital medications
- e. OB-GYN History update:
 - i. The existing GYN history will be replaced with the Adult H&P history content with the addition of specific OB/GYN history. This will enable the information to recall fluidly across all notes.

8. Cardiology:

- a. Heart Failure Consultation
 - Currently, there is not a place for labs to pull into the note template. The note template is now being updated for a “Results and Free Text Obj” Notes header. The labs will pull into the “Findings/Data” field mimicking the Cardiology Consultation note template.
- b. The Int. Cardiology Progress and Int. Cardiology Consult notes have been updated with the “Free Text Objective Notes” section that mimics the Cardiology Progress note template.
- c. Cath Post Procedure Note – Procedure addition
 - The “endomyocardial biopsy” response has been added to the “Procedure performed” field in both Cath Post Proc – Full and Cath Post Proc - Brief note templates
- d. Bleeding Risk Score
 - Link to the American College of Cardiology risk stratification and place to document the results for cath PCI bleeding risk. The **Bleeding Risk Score** header has been added to the following note templates:
 - Cath Post Proc – Full
 - Cath Post Proc – Brief
 - Int/ Cardiology Consult note
 - Cardiology Consultation
 - Cardiology Progress Note

CPOE updates

CONFIDENTIAL – Contains proprietary information.
Not intended for external distribution.

Telemetry Order

Telemetry and Telemetry remote needs to be selected under Level of Care Order

Telemetry initiation order (48 hours or Continuous monitoring) needs to be entered separately

Procedure Ordered
