

2022.2 MEDITECH Updates

Coming June 2, 2022

CONFIDENTIAL – Contains proprietary information.
Not intended for external distribution.

PDOC Updates:

Behavioral Health, Cardiology, Discharge notes, Hospitalist notes

○ Behavioral Health:

- **Patient Safety plan note** is a **new note** and can also be added to any note by **clicking Add Section**.
- The **Quality Header** has been added to all of the Behavioral Health notes.
- The **Multiple Anti-psych Med section** was removed from the Med Rec header and moved to the Quality header.

○ Cardiology:

- The **Bleeding Risk Calculator** has **new instructions** that have been added to the ACC calculator field.

○ Chief Complaint – Active Recall:

- The **Chief Complaint field** has been updated to recall to subsequent notes within a service line
- All HCA templates are included in this update.

○ Discharge note Templates:

- The **Discharge Note Field** has been made **REQUIRED** because it is often not being addressed and requires follow up to occur from HIM.
- This Update is applicable to ALL discharge note templates.

○ Hospitalist Notes:

- The **ASCVD Risk Estimation** section, along with the Risk tool and Est. ASCVD risk score fields, are new and have been added under the **BISAP Score** section

PDOC Updates: LAAC H&P, OB & Operative

○ LAAC H&P (Left Atrial Appendage Closure):

- The **LAAC H&P** note is a new note template with additional fields.
- The **Pertinent Cardiac History** section was added to facilitate the capture of specific documentation required for LAAC.
- For any cardiac surgery history selected, the “date (if known)” should be included in the Comment line for the **Cardiac History field**.

○ OB Delivery Note:

- The **OB Delivery Note** has separated **Vaginal** and **Cesarean** specific content to streamline documentation. The General section contains content pertinent to both of deliveries. The Operative report section is available if documenting in that format if preferred.
- **The Blood Loss/Details** section has moved under the **Steroids Prior Delivery** section.
- **The Op/Inv Proc Note – Brief** and **Operative Note Full** sections have both moved under the baby information sections.
- **Two new headers have been created** and removed from the **General** header: **Vaginal** and **Cesarean**.
- A new **Rectal Field** has been added under Physical Exam Header

PDOC Updates: PICU Sedation Assess, Synoptic Note & Well Baby Post Proc

○ Operative Note:

- The Operative Note – Full and Op/Inv Proc Note – Brief have both been updated. The surgeon must verbally acknowledge the count and document all counts are correct. Preventing the unintentional retention of surgical objects in a surgical wound requires documentation to address incorrect counts. Adding packing will help providers document type and length of packing used.
- The **Packing field** is **New**

○ PICU Sedation Assess Note:

- The **PICU Sedation Assess Note** is a new note. This note was copied from the Pre Sedation Assess note with additional changes added.

○ Synoptic Note Update:

- If the provider indicates a synoptic procedure was completed, **all** corresponding synoptic fields become required due to newly revised synoptic reports for accreditation.

○ Well Baby Post Proc – Full:

- **Well Baby Post Proc – Full note** has been updated by adding a **new section** to document Digit removal on the already existing note template.
